

ICMP Status Code

ICMP type (8 bits):

0: Echo reply

3: Destination unreachable

Code (8 bits):

- 0: Net unreachable
- 1: Host unreachable
- 2: Protocol unreachable
- 3: Port unreachable
- 4: Fragmentation needed and DF set
- 5: Source route failed
- 6: Network unknown
- 7: Host unknown
- 8: Source host isolated
- 9: Network administratively prohibited
- 10: Host administratively prohibited
- 11: Network unreachable for TOS
- 12: Host unreachable for TOS
- 13: Communication administratively prohibited
- 14: Host precedence violation
- 15: Precedence cutoff in effect

4: Source quench

5: Redirect message

Code (8 bits):

- 0: Redirect for network
- 1: Redirect for host
- 2: Redirect for type of service and network
- 3: Redirect for type of service and host

8: Echo request

11: Time exceeded

Code (8 bits):

- 0: Time to live exceeded in transit
- 1: Fragment reassembly time exceeded

12: Parameter problem

Code (8 bits):

- 0: Pointer indicates the error
- 1: Missing a required option
- 2: Bad length

13: Timestamp

14: Timestamp reply

15: Information request

16: Information reply

17: Address mask request

18: Address mask reply

ICMP code (8 bits):

- 0: echo reply (used with echo request)
- 1: destination unreachable (used with destination unreachable)
- 2: source quench (used with source quench)
- 3: redirect (used with redirect)
- 4: alternate host address (not used)
- 5: redirect (not used)
- 6: alternate host address (not used)
- 7: time exceeded (used with time exceeded)
- 8: parameter problem (used with parameter problem)
- 9: message type is not implemented
- 10: message type is not implemented
- 11: time exceeded (not used)
- 12: parameter problem (not used)
- 13: timestamp (used with timestamp)
- 14: timestamp reply (used with timestamp)
- 15: information request (used with information request)
- 16: information reply (used with information reply)
- 17: address mask request (used with address mask request)
- 18: address mask reply (used with address mask reply)
- 19255: Reserved for future use
